Foreword

The collection and conservation of crop and forage genetic resources have intensified over the last fifteen years. This has included *Centrosema*, a New World legume of high forage potential and the subject of this catalog. IBPGR has cooperated with CIAT and national programs in this effort.

The increased interest in the genus, its collection, and exchange of germplasm between collections has given rise to considerable duplication in the holdings of gene banks conserving *Centrosema*. Rationalization of these germplasm collections and their documentation is a prerequisite for their effective utilization.

Prefacio

Durante los últimos quince años se han intensificado la recolección y la conservación de los recursos genéticos de cultivos y especies forrajeras. Esto incluye a *Centrosema*, una leguminosa del Nuevo Mundo con un alto potencial forrajero que constituye el tema de este catálogo. En este esfuerzo, el International Board for Plant Genetic Resources (IBPGR) ha colaborado con el CIAT y con los programas nacionales.

El creciente interés en el género, en su recolección y en el intercambio de germoplasma entre instituciones ha dado origen a una considerable duplicación de accesiones en los bancos de germoplasma que conservan a *Centrosema*.

La racionalización de estas colecciones y su correspondiente documentación constituyen un requisito para su efectiva utilización.

This catalog compiles and cross-references the accessions in the world's major *Centrosema* collections at CIAT, ILCA, CSIRO, EMBRAPA-CENARGEN, and AREC Fort Pierce-University of Florida. It is a collaborative effort by the curators of these collections under the coordination of Dr. Rainer Schultze-Kraft of CIAT. IBPGR is pleased to join with CIAT in the publication of this catalog.

D. H. van Sloten
Acting Director
IBPGR

Este catálogo compila las accesiones contenidas en las principales colecciones de *Centrosema* de CIAT, ILCA, CSIRO, EMBRAPA-CENARGEN y AREC Fort Pierce, University of Florida, y de ellas presenta además referencias cruzadas. Es también un esfuerzo colaborativo de los curadores de estas colecciones bajo la coordinación del Dr. Rainer Schultze-Kraft, del CIAT. El IBPGR se une complacido a CIAT en la publicación de este catálogo.

D. H. van Sloten
Director Encargado
IBPGR

Introduction

Centrosema is an important New World genus of tropical and subtropical legumes. Its agricultural potential as a forage and ground cover was highlighted during the international workshop, "Centrosema: Biology, Agronomy, and Utilization," held during 23-27 February 1987 at the Centro Internacional de Agricultura Tropical (CIAT), Cali, Colombia.

A measure of the interest in *Centrosema* is the growth of germplasm collections which have substantially increased in the major gene banks during the past 15 years. For example, the collection held by the Commonwealth Scientific and Industrial Research Organisation (CSIRO), Brisbane, Australia, grew from 328 accessions in January 1977 to 1156 accessions (this catalog), and the CIAT collection from 232 accessions in December 1977 to 2246 accessions (this catalog). This growth is not only the result of intensified collection of *Centrosema* in the wild, but also reflects the increased germplasm exchange between interested institutions.

Intensive germplasm exchange almost inevitably leads to an inflation of collections because of duplication of accessions. During the *Centrosema* workshop the danger of such inflations, and the serious implications in terms of seed multiplication and germplasm maintenance efforts, were recognized. It was consequently recommended to collate the available information into a world catalog which would include, and cross-reference, all living *Centrosema* accessions available in the major collections of tropical and subtropical forage germplasm.

The present catalog is the result of that recommendation. It is the product of efforts shared between CSIRO; the Centro Nacional de

Recursos Genéticos (CENARGEN) of the Empresa Brasileira de Pesquisa Agropecuária (EMBRAPA), Brasilia, Brazil; the International Livestock Centre for Africa (ILCA), Addis Ababa, Ethiopia; the Agricultural Research and Education Center (AREC) Fort Pierce, Florida, of the University of Florida's Institute of Food and Agricultural Sciences (IFAS), USA; and CIAT. The information presented is that available on 1st January 1989. It is the first time that such a world catalog is produced for a tropical forage genus.

Some important concepts and explanations regarding the structure of this catalog and its use are as follows:

1. Only actually living material, i.e., germplasm available in the form of seed or plants, and only material held in any of the major *Centrosema* collections, has been considered for this catalog. Institutions holding these major collections and their respective plant introduction numbers are:

CIAT--CIAT No.;

The Australian Tropical Forages Genetic Resources Centre at CSIRO--CPI No. (and also Q, CQ, and QC numbers);

EMBRAPA-CENARGEN-BRA No. (the only internationally valid Brazilian plant introduction number);

ILCA--ILCA No.; and

AREC Fort Pierce of IFAS, University of Florida--IRFL No.

2. The germplasm in this catalog consists almost exclusively of material collected in the wild. Breeders' lines are included only insofar as they refer to reasonably stable lines that have been assigned a plant introduction number.
3. Collectors' numbers are only listed in the very few cases where the respective germplasm was introduced to other collections without having been assigned a plant introduction number in its country of origin or by the collector's institution. The use of a collector's number as the most original number of a germplasm accession has become cumbersome, because collection missions are increasingly carried out as joint ventures, sponsored by different institutions, in which their individual scientists keep separate records of the collected material and share the original seeds. To solve the problem of identifying the originality of an accession, in this catalog an asterisk accompanying an accession number is used to indicate where the original information on that accession and its collection site, and, possibly, its original seeds are available.
4. The species names used in this catalog are those recognized by Williams and Clements (n.d.)¹. Species identification, based on Williams and Clements' key, is confirmed only for accessions with CPI and/or CIAT numbers.
5. This catalog consists of nine sections. The first section is the catalog as such, that is, the *Centrosema* world collection in species order. The second section is a list of accessions in the CIAT collection, put in order of accession number. Sections 3 to 7 are the Australian, Brazilian, ILCA, AREC Fort Pierce, and the former Instituto de Pesquisas IRI collections, respectively, each in order of accession number. The two last sections are a list of other plant introduction numbers, and a list of invalid or nonpreferred synonym numbers. Both are in alphanumeric order.
6. Each section is preceded by a few introductory remarks and explanations which, for the sake of a better understanding of the information presented, should be carefully read.
7. Acronyms and abbreviations used in this catalog are listed in Appendix I. Maps showing the natural distribution of *Centrosema* spp. are presented in Appendix II. They are taken from a recent biogeographical *Centrosema* study by Schultze-Kraft et al. (n.d.)².
8. In this first attempt to produce a *Centrosema* world catalog, the identification of duplicates was the principal concern. Any future update of this catalog should emphasize the filling of serious gaps in information on the originality

1. Williams, R. J. and Clements, R. J. n.d. Taxonomy of *Centrosema*. In: Schultze-Kraft, R. and Clements, R. J. (eds.). *Centrosema: Biology, agronomy, and utilization*. CIAT, Cali, Colombia. (In press.)

2. Schultze-Kraft, R.; Williams, R. J.; and Coradin, L. n.d. Biogeography of *Centrosema*. In: Schultze-Kraft, R. and Clements, R. J. (eds.). *Centrosema: Biology, agronomy, and utilization*. CIAT, Cali, Colombia. (In press.)

of many accessions, collection dates, collection origins, and suborigins. There is no doubt that further work will also result in the identification of further duplicate accessions within and across the major *Centrosema* collections.

9. Other issues of particular concern for future work are:

The need to thoroughly check the actual existence of accessions in the form of living material. Because CIAT has assumed global responsibility for maintaining the *Centrosema* base collection, seed should be made available to CIAT of all those accessions which so far have not been registered at CIAT ("NR" in this catalog's "CIAT No." column).

The need for proper species identification, particularly of material still listed as "*Centrosema* sp." Colleagues are encouraged to send herbarium specimens directly, or through CIAT, to the *Centrosema* taxonomy specialist, R. J. Williams (CSIRO).

The need to collect germplasm of poorly collected species. It is hoped that the natural distribution maps in Appendix II (p. 299) will assist the design of strategies for future collections.

Any corrections to this catalog or suggestions for its improvement will be most welcome.

Rainer Schultze-Kraft
CIAT

Centrosema es un importante género de leguminosas tropicales y subtropicales del Nuevo Mundo. Su potencial como planta forrajera y cultivo de cobertura fué destacado durante la Reunión Internacional de Trabajo “*Centrosema: Biología, Agronomía y Utilización*”, celebrada del 23 al 27 de febrero de 1987, en el Centro Internacional de Agricultura Tropical (CIAT), Cali, Colombia.

Una medida del interés en este género es el crecimiento de las colecciones de su germoplasma. Estas han aumentado considerablemente durante los últimos 15 años. Por ejemplo, la colección del Commonwealth Scientific and Industrial Research Organisation (CSIRO), en Brisbane, Australia, ha aumentado de 328 accesiones (enero de 1977) hasta 1156 accesiones (las de este catálogo), y la colección del CIAT desde 232 accesiones (diciembre de 1977) hasta 2246 accesiones (las de este catálogo). Este crecimiento no sólo es el resultado de actividades intensificadas de recolección de ecotípos en la flora silvestre, sino también el reflejo del mayor intercambio de germoplasma realizado entre las instituciones interesadas.

El intercambio intensivo de germoplasma conduce casi inevitablemente a la inflación de las colecciones a causa de los duplicados que trae la introducción repetida de materiales idénticos. Durante la reunión de 1987 sobre *Centrosema*, se reconoció el peligro de estas inflaciones y las consecuencias serias que tienen en términos de multiplicación de semilla y mantenimiento de germoplasma. En consecuencia, se recomendó compilar toda la información disponible en un catálogo mundial de *Centrosema* que incluiría, con

referencias cruzadas, todas las accesiones vivas y disponibles en las principales colecciones de germoplasma de forrajeras tropicales y subtropicales.

El presente catálogo es el resultado de esa recomendación. Es el producto de los esfuerzos compartidos entre las siguientes instituciones: CSIRO; el Centro Nacional de Recursos Genéticos (CENARGEN) de la Empresa Brasileira de Pesquisa Agropecuária (EMBRAPA), Brasilia, Brasil; el International Livestock Centre for Africa (ILCA), Addis Abeba, Etiopía; el Agricultural Research and Education Center (AREC) Fort Pierce, del Institute of Food and Agricultural Sciences (IFAS) de la University of Florida, EE.UU.; y el CIAT. La información presentada es la que está disponible el 10. de enero de 1989. Es la primera vez que se produce un catálogo mundial para un género de forrajeras tropicales.

Algunos conceptos y explicaciones importantes con respecto a la estructura de este catálogo y su uso son los siguientes:

1. Se ha considerado sólo material vivo, es decir, germoplasma disponible en forma de semillas o plantas, y sólo material mantenido en cualquiera de las principales colecciones de *Centrosema* que existen actualmente. Las instituciones en que están estas colecciones principales, y sus respectivos códigos de introducción de germoplasma, son:
 - CIAT: No. CIAT;
 - Australian Tropical Forages Genetic

- Resources Centre, de CSIRO: No. CPI (éste principalmente; también Nos. Q, CQ, y QC);
- EMBRAPA-CENARGEN: No. BRA (el único número de introducción brasileño internacionalmente válido);
 - ILCA: No. ILCA; y
 - AREC Fort Pierce de IFAS-University of Florida: No. IRFL.
2. El germoplasma de este catálogo consta casi exclusivamente de material colectado en la flora silvestre. Respecto a materiales de programas de fitomejoramiento, sólo se incluyen aquellas líneas relativamente estables a las cuales se ha asignado un código de introducción.
3. No se incluyen los números de campo asignados por los colectores, con excepción de algunos casos en los cuales el germoplasma respectivo se ha introducido a otras colecciones sin que hubiera recibido otro número original. El uso del número asignado por el colector como el número más original de una accesión, se ha tornado algo impracticable porque las misiones de recolección se llevan a cabo cada vez más como proyectos colaborativos, con varios individuos (quienes representan diferentes instituciones), llevando registros separados del material colectado y compartiendo las semillas originales. En este catálogo, para señalar dónde está disponible la información original acerca de una accesión así como acerca de su sitio de

recolección, y dónde pueden estar disponibles las semillas originales, se ha optado por identificar la originalidad de una accesión, o sea, el número de su institución "dueña", agregando un asterisco (*) al número respectivo.

4. Los nombres de especies usados en este catálogo son aquellos reconocidos por Williams y Clements (en impresión)¹. La identificación de especies, basada en la clave de Williams y Clements, está confirmada sólo para las accesiones con números CPI o CIAT-o con ambos.
5. Este catálogo consta de nueve secciones. La primera sección es el catálogo como tal, o sea la colección mundial de *Centrosema* en orden de especies. La segunda es una lista de las accesiones en la colección de CIAT, ordenada por número de accesión. Las secciones 3 a 7 son las colecciones australiana, brasileña, de ILCA, de AREC Fort Pierce, y del anterior Instituto de Pesquisas IRI, respectivamente, cada una en orden numérico. Las dos últimas secciones son una lista de otros códigos de introducción, y una lista de códigos de sinónimos inválidos o no preferidos. Ambas están en orden alfanumérico.
6. Cada sección está precedida por comentarios introductorios y por explicaciones; se sugiere que éstos sean leídos cuidadosamente para lograr una mejor comprensión de la información presentada.

1. Williams, R. J. y Clements, R. J. Taxonomy of *Centrosema*. En: Schultze-Kraft, R. y Clements, R. J. (eds.). *Centrosema: Biology, agronomy, and utilization*. CIAT, Cali, Colombia. (En impresión.)

7. Las siglas y abreviaturas usadas en este catálogo se enumeran en el Apéndice I. Mapas que muestran la distribución natural de las especies de *Centrosema* se presentan en el Apéndice II; han sido tomados de un reciente estudio biogeográfico sobre *Centrosema* (Schultze-Kraft et al., en impresión)².
 8. En este primer intento para producir un catálogo mundial de *Centrosema*, la identificación de duplicados fue el objetivo principal. En una futura versión actualizada de este catálogo se debe atribuir una importancia similar al esfuerzo por llenar el gran número de brechas que aún existen con respecto a la siguiente información: 1) la originalidad de muchas accesiones, 2) las fechas de recolección, y 3) los orígenes y suborígenes de las accesiones. No hay duda de que tales esfuerzos complementarios darán lugar también a la identificación de más accesiones duplicadas, tanto dentro como entre las principales colecciones de *Centrosema*.
 9. Otros puntos importantes en relación con el perfeccionamiento de este catálogo son:
 - La necesidad de chequear exhaustivamente si las accesiones enumeradas aún existen físicamente en sus respectivas colecciones.
- La necesidad de recibir en el CIAT semillas de todas aquellas accesiones que hasta el presente no se hayan registrado en este Centro (identificadas en este catálogo como "NR" en a columna "CIAT No."). CIAT ha asumido la responsabilidad global de mantener la colección base de *Centrosema*.
 - La necesidad de obtener determinaciones taxonómicas confirmadas a nivel de especie, en particular para el material que todavía figura como "*Centrosema* sp." Se sugiere enviar las respectivas muestras de herbario directamente (o a través del CIAT), al especialista en taxonomía de *Centrosema*, R. J. Williams (CSIRO).
 - La necesidad de recolectar germoplasma de especies hasta ahora poco colectadas. Se espera que los mapas de distribución natural del Apéndice II (p. 299) ayuden a diseñar estrategias para futuras actividades de recolección.

Cualquier corrección que requiera este catálogo o sugerencia para mejorarlo será bien recibida.

Rainer Schultze-Kraft
CIAT

2. Schultze-Kraft, R.; Williams, R. J. y Coradin, L. Biogeography of *Centrosema*. En: Schultze-Kraft, R. y Clements, R. J. (eds.). *Centrosema: Biology, agronomy, and utilization*. CIAT, Cali, Colombia. (En impresión.)

SECTION 1. World collection by species

Introduction

This section lists all *Centrosema* accessions available in the major germplasm collections as of 1st January 1989. It is alphabetically ordered by species. The only species not represented are *C. dasyanthum* and *C. heptaphyllum* which have not yet been collected.

The first column refers to the CIAT accession number which forms the basis of this catalog. Accessions within species are listed in numerical order, and each accession number is followed by the respective abbreviated species name (for species abbreviations see Appendix I, p. 295). Accessions within a given species that are not in the CIAT collection, but do exist in another major collection, are separately listed under "NR" ("not registered") instead of under a CIAT number.

Columns 2 to 6 present the respective principal accessions numbers in the collections of CSIRO (mainly CPI Nos.), EMBRAPA, ILCA, AREC-FP, and IRI. In the 7th column, "Other Plant Introduction Nos."

are mentioned, i.e., accession numbers assigned by a series of other, major institutions actively involved in the collection, distribution, and exchange of *Centrosema* germplasm (for acronyms see Appendix I, p. 296-297). This column, however, also contains some CPI, ILCA, and IRI numbers which, in spite of being possible duplicates, are not considered as redundant synonyms, but rather as valid and equivalent to the respective principal accession numbers.

Column 8 lists accession numbers which, as a result of the preparation of this catalog, are considered as redundant, invalid, or nonpreferred--they should not be used.

The "Observations" column provides any relevant additional information, where applicable. Further passport information, where available, is included in the "Collection Date," "Origin" (for country abbreviations see Appendix I, p. 295-296) and "Suborigin" columns.

SECCION 1. Colección mundial por especies

Introducción

Esta sección enumera todas las accesiones de *Centrosema* disponibles en los principales bancos de germoplasma desde el 1o. de enero de 1989. Está organizada

alfabéticamente por especies. Las únicas especies no representadas son *C. dasyanthum* y *C. heptaphyllum*. La primera columna se refiere al número de accesión

del CIAT ("CIAT No.") que es la base para este catálogo. Las accesiones, dentro de las especies, se presentan en orden numérico, y cada número de accesión va seguido por el nombre abreviado de la respectiva especie (para las abreviaturas, ver el Apéndice I, página 295). Las accesiones contenidas dentro de una especie dada, que no están en la colección de CIAT pero que si existen en cualquiera de las otras colecciones principales, se enumeran separadamente con "NR" ("no registrado") y no con un número CIAT.

Las columnas 2 a 6 presentan los números de accesión principales en las colecciones de CSIRO (especialmente el número CPI), de EMBRAPA, de ILCA, de AREC-FP, y de IRI. En la séptima columna ("Other Plant Introduction Nos.", Otros códigos de introducción de germoplasma) se mencionan números de accesión adicionales, asignados por otras instituciones involucradas activamente en la recolección, distribución e intercambio de

germoplasma de *Centrosema* (para las siglas, ver el Apéndice I, páginas 296-297). Esta columna, sin embargo, contiene algunos números CPI, ILCA e IRI, los cuales, a pesar de tratarse de posibles duplicados, no se consideran como sinónimos redundantes sino como códigos válidos y equivalentes a los números de accesión principales.

La octava columna ("Synonym Nos.") presenta números de accesión que, como resultado de la preparación de este catálogo, se consideran redundantes, inválidos o no preferidos. Estos números no se deben usar.

La columna "Observations" proporciona cualquier información adicional relevante. En las últimas tres columnas ("Collection Date", "Origin" y "Suborigin") se presenta más información de pasaporte, cuando ésta estaba disponible. Para las abreviaturas de países usadas en "Origin", ver el Apéndice I, páginas 295-296.

SECTION 2. List of CIAT accessions

Introduction

This section consists of a list of all valid *Centrosema* accessions in the CIAT collection, numerically ordered and accompanied by the respective species name. The objective of this list is to identify rapidly the species to which any CIAT *Centrosema* accession belongs. Any required additional information can then easily be looked up in the previous section (World Collection by Species).

Any CIAT *Centrosema* accession not included in this list, may be an invalid synonym which will be found in the final section of this catalog (Synonym Nos.,

p. 285). If it does not appear there either, then it must be an introduction that is no longer available.

Name and address of the curator of the CIAT *Centrosema* collection:

Rainer Schultze-Kraft
Centro Internacional de Agricultura Tropical
(CIAT)
Apartado Aéreo 6713
Cali, Colombia

SECCION 2. Lista de accesiones de CIAT

Introducción

Esta sección consta de una lista de todas las accesiones válidas de *Centrosema* en la colección de CIAT, organizadas numéricamente y acompañadas por el respectivo nombre de especie. El objetivo de esta lista es identificar rápidamente la especie de *Centrosema* a la cual pertenece cualquier número CIAT. Cualquier información adicional que se requiera, se podrá buscar fácilmente en la sección anterior (Colección Mundial por Especies).

Cualquier accesión de *Centrosema* de CIAT no incluida en esta lista debe ser un sinónimo inválido que se puede hallar en la sección final de este catálogo

("Synonym Nos.", página 285). Si no aparece allí tampoco, se tratará de una introducción que ya no está disponible.

Nombre y dirección del curador de la colección de *Centrosema* del CIAT:

Rainer Schultze-Kraft
Centro Internacional de Agricultura Tropical
(CIAT)
Apartado Aéreo 6713
Cali, Colombia

SECTION 3. CSIRO collection

Introduction

This section consists of that part of the *Centrosema* world collection which is held at the Australian Tropical Forages Genetic Resources Centre at CSIRO, Brisbane. Plant introduction numbers used in the system are CPI and Q (Queensland), and other more internal numbers such as CQ or QC. In this section, they are listed numerically and are cross-referenced to the respective CIAT Nos. (and species identification), and/or to BRA, ILCA, IRFL, and IRI numbers. All further information is the same as in Section 1 (World Collection).

Any Australian *Centrosema* accession not appearing in the "CPI No." column may be found either in the "Other Plant Introduction Nos." column because it is a duplicate accession number which, however, is valid and equivalent to the principal number, or in the

"Synonym Nos." column because it is a nonpreferred duplicate number. For the respective searches within these columns, please use the numerically ordered lists in Sections 8 (p. 253) or 9 (p. 285), respectively.

Name and address of the curator of the CSIRO *Centrosema* collection:

Ronald J. Williams
Commonwealth Scientific and Industrial
Research Organisation (CSIRO)
Cunningham Laboratory
306 Carmody Road
St. Lucia, Queensland 4067
Australia

SECCION 3. Colección de CSIRO

Introducción

Esta sección comprende aquella parte de la colección mundial de *Centrosema* que es mantenida por CSIRO, Brisbane, en el Australian Tropical Forages Genetic Resources Centre. Los códigos de introducción usados en el sistema son CPI y Q (Queensland), además de algunos códigos más internos como CQ o QC; se presentan en orden numérico, haciendo referencia cruzada a los respectivos números CIAT (y a la identificación de especie) o también a los números BRA, ILCA, IRFL e IRI. La información adicional es la

misma de la Sección 1 de este catálogo (Colección Mundial).

Cualquier accesión australiana de *Centrosema* que no aparezca en la columna "CPI No." debe encontrarse o en la columna "Other Plant Introduction Nos."--sería entonces un posible duplicado pero con número de accesión válido y equivalente al número principal--o en la columna "Synonym Nos.", por tratarse de un duplicado con número no preferido. Para las

búsquedas respectivas dentro de esas columnas,
sírvase usar las listas numéricamente ordenadas de
la Sección 8 (p. 253) y de la sección 9 (p. 285).

SECTION 4. EMBRAPA collection

Introduction

This section consists of that part of the *Centrosema* world collection which is held or coordinated by EMBRAPA-CENARGEN. The plant introduction number used is the 6-digit BRA No.; it has priority over other local and regional accession numbers used in the EMBRAPA system such as the CPAC or CNPGC numbers.

It should be pointed out that a given BRA No. can exist for different genera: the BRA numbering system starts for every genus independently. Therefore, a BRA No. should not be used alone but with the respective genus name or its numerical code. The genus code for *Centrosema* is 19429 in the EMBRAPA system.

In this section, the BRA numbers are listed numerically and are cross-referenced to the respective CIAT Nos. (and species identification), and/or to CPI, ILCA, IRFL, and IRI numbers. All further information is the same as in this catalog's Section 1 (World Collection).

Any *Centrosema* BRA accession not appearing in the "BRA No." column should be found in the "Synonym Nos." column because it would be an invalid duplicate number that should not be used. For searching in that column, please use the numerically ordered list in Section 9 (p. 285).

Name and address of the curator of the EMBRAPA *Centrosema* collection:

Lidio Coradin
Empresa Brasileira de Pesquisa Agropecuária
(EMBRAPA)
Centro Nacional de Recursos Genéticos
(CENARGEN)
Caixa Postal 10.2372
70.770 Brasília-DF
Brazil

SECCION 4. Colección de EMBRAPA

Introducción

Esta sección comprende aquella parte de la colección mundial de *Centrosema* que es mantenida o coordinada por EMBRAPA-CENARGEN. El código de introducción usado es el número BRA de seis dígitos; tiene prioridad sobre otros números de accesión locales y regionales que se usan en el sistema de EMBRAPA (como los números CPAC, CPNGC, etc.).

Se debe señalar que puede haber un número BRA dado para diferentes géneros: el sistema de numeración BRA comienza en cada género independientemente. En consecuencia, un número BRA no se debe usar solo sino con el respectivo nombre de género o su código numérico. En el sistema de EMBRAPA, este código de género para *Centrosema* es 19429.

En esta sección, los números BRA se presentan en orden numérico, haciendo referencia cruzada a los respectivos números CIAT (y a la identificación de especie) o también a los números CPI, ILCA, IRFL e IRI. La información adicional es la misma de la Sección 1 de este catálogo (Colección Mundial).

Cualquier accesión BRA de *Centrosema* que no aparezca en la columna "BRA No." debe encontrarse en la columna "Synonym Nos.", pues se trataría de un duplicado con un número inválido que no se debe usar. Para hacer la búsqueda en esta columna, sírvase usar la lista numéricamente ordenada de la Sección 9 (p. 285).

Nombre y dirección del curador de la colección de *Centrosema* de EMBRAPA:

SECTION 5. ILCA collection

Introduction

This section consists of that part of the *Centrosema* world collection which is held by ILCA. The ILCA numbers are listed numerically and are cross-referenced to the respective CIAT Nos. (and species identification), and/or to CPI, BRA, IRFL, and IRI numbers. All further information is the same as in this catalog's Section 1 (World Collection).

There are a few accessions appearing as valid duplicate numbers in the "Other Plant Introduction Nos." column but none in the "Synonym Nos." column.

Names and address of the curators of the ILCA *Centrosema* collection:

Jean Hanson and John R. Lazier
International Livestock Centre for Africa
(ILCA)
P.O. Box 5689
Addis Ababa
Ethiopia

SECCION 5. Colección de ILCA

Introducción

Esta sección comprende aquella parte de la colección mundial de *Centrosema* que es mantenida por el ILCA. Los números ILCA se presentan en orden numérico, haciendo referencia cruzada a los respectivos números CIAT (y a la identificación de especie) o también a los números CPI, BRA, IRFL e IRI. La información adicional es la misma de la Sección 1 de este catálogo (Colección Mundial).

Unas pocas accesiones aparecen en la columna "Other Plant Introduction Nos." como números válidos para duplicados, pero no existe ningún número en la columna "Synonym Nos."

Nombres y dirección de los curadores de la colección de *Centrosema* del ILCA:

Jean Hanson y John R. Lazier
International Livestock Centre for Africa
(ILCA)
P.O. Box 5689
Addis Ababa
Ethiopia

SECTION 6. University of Florida - AREC Fort Pierce collection

Introduction

This section consists of that part of the *Centrosema* world collection which is held by AREC-FP. The IRFL plant introduction numbers are listed numerically and are cross-referenced to the respective CIAT Nos. (and species identification), and/or to CPI, BRA, ILCA, and IRI numbers. All further information is the same as in Section 1 (World Collection).

Any *Centrosema* IRFL accession not listed in the "IRFL No." column should appear in the "Synonym Nos." column because it would be a redundant, nonpreferred, duplicate number. For searching in that column,

please use the numerically ordered list in Section 9 (p. 285).

Name and address of the curator of the AREC-FP *Centrosema* collection:

Albert E. Kretschmer, Jr.
University of Florida
Agricultural Research and Education Center
P.O. Box 248
Fort Pierce, FL 33454-0248
USA

SECCION 6. Colección de la University of Florida - AREC Fort Pierce

Introducción

Esta sección comprende aquella parte de la colección mundial de *Centrosema* que es mantenida por AREC-FP. Los códigos de introducción IRFL se presentan en orden numérico, haciendo referencia cruzada a los respectivos números CIAT (y a la identificación de especie) o también a los números CPI, BRA, ILCA e IRI. La información adicional es la misma de la Sección 1 de este catálogo (Colección Mundial).

Cualquier accesión IRFL de *Centrosema* que no se encuentre en la columna "IRFL No." debe aparecer en la columna "Synonym Nos.", pues se trataría de un duplicado con número redundante. Para hacer la

búsqueda en esa columna, sírvase usar la lista numéricamente ordenada de la Sección 9 (p. 285).

Nombre y dirección del curador de la colección de *Centrosema* de AREC-FP:

Albert E. Kretschmer, Jr.
University of Florida
Agricultural Research and Education Center
P.O. Box 248
Fort Pierce, FL 33454-0248
USA

SECTION 7. IRI collection

Introduction

This section consists of that part of the *Centrosema* world collection which was formerly held by the Instituto de Pesquisas IRI but had been introduced to other collections. Since IRI terminated its germplasm collection, maintenance, and evaluation activities in 1978, all IRI accessions in this catalog are older material. Because of IRI's pioneer role and the importance of the collection (Shock et al., 1979)³, this catalog includes a separate "IRI No." column. In this column, the accessions are

listed numerically and are cross-referenced to the respective CIAT Nos. (and species identification), and/or to CPI, BRA, ILCA, and IRFL numbers. All further information is the same as in Section 1 (World Collection).

A few accessions not listed in the "IRI No." column can be found in the "Other Plant Introduction Nos." column because they would be valid duplicate numbers.

SECCION 7. Colección de IRI

Introducción

Esta sección comprende aquella parte de la colección mundial de *Centrosema* que anteriormente estuvo mantenida por el Instituto de Pesquisas IRI y fué introducida a otras colecciones. Como IRI terminó sus actividades de recolección, mantenimiento y evaluación de germoplasma en 1978, todas las accesiones IRI de este catálogo son un material relativamente viejo. Aunque se trata de una colección inactiva, la función pionera del IRI y la importancia de su colección (Shock et al., 1979)³, han llevado a la inclusión, en este catálogo, de una columna

separada ("IRI No."). Las accesiones se presentan en orden numérico, haciendo referencia cruzada a los respectivos números CIAT (y a la identificación de especie) o también a los números CPI, BRA, ILCA e IRFL. La información adicional es la misma de la Sección 1 de este catálogo (Colección Mundial).

Unas pocas accesiones no enumeradas en la columna "IRI No." se podrán encontrar en la columna "Other Plant Introduction Nos.", por tratarse de materiales duplicados aunque con números válidos.

3. Shock, C. C.; Mossocato, A. J. M.; and Veasey, A. J. 1979. Inventário de gramíneas e leguminosas forrageiras: Um banco de germoplasma servindo o Brasil desde 1962. Instituto de Pesquisas IRI, Matão-SP, Brasil. 129 p.

SECTION 8. List of other plant introduction numbers

Introduction

This section consists of a list of all accessions included in the "Other Plant Introduction Nos." column of Section 1 (World Collection). They are accession numbers assigned by a series of institutions other than CIAT, CSIRO, EMBRAPA-CENARGEN, ILCA, AREC-FP, and Instituto de Pesquisas IRI, and which are actively involved in the collection, distribution, and exchange of *Centrosema* germplasm (for acronyms see Appendix I, p. 296-297). Accessions which are not represented in at least one of the major *Centrosema* collections are excluded.

The list includes, furthermore, a series of CPI numbers and also a few ILCA and IRI duplicate numbers which are not considered as redundant synonyms (and therefore have no place in the "Synonym Nos." column), but rather as numbers valid and equivalent to the

respective principal accession numbers. Numbers are alphabetically and numerically ordered and cross-referenced to the respective CIAT Nos. (and species identification), and/or to CPI, BRA, ILCA, IRFL, and IRI numbers. For further information of a given accession, any relevant section in this catalog can then be consulted.

This list includes also some collectors' numbers (namely of R. J. Clements, V. Gianluppi, K. L. Mehra, A. L. Peixoto, and J. M. Sobrinho). The reason for their inclusion is that there was no other original accession number available that would have been assigned in the country of the respective germplasm's origin or by the collector's institution.

SECCION 8. Lista de otros códigos de introducción de germoplasma

Introducción

Esta sección consta de una lista de todas las accesiones incluidas en la columna "Other Plant Introduction Nos." de la Sección 1 (Colección Mundial). Son números de accesión asignados por otras instituciones que están activamente involucradas en la recolección, distribución e intercambio de germoplasma de *Centrosema* (para las siglas, ver Apéndice I, p. 296-297). Las accesiones que no estén representadas en una, por lo

menos, de las principales colecciones de *Centrosema* (CIAT, CSIRO, EMBRAPA-CENARGEN, ILCA, AREC-FP), fueron excluidas.

La lista incluye además una serie de números CPI, y también varios números ILCA e IRI, los cuales, a pesar de referirse a probables duplicados, no se consideran como sinónimos redundantes (no tienen por ello un lugar en la columna "Synonym Nos.")

sino más bien como códigos válidos y equivalentes a los números de accesión principales. Los códigos se presentan en orden alfanumérico, haciendo referencia cruzada a los respectivos números CIAT (y a la identificación de especie) o también a los números CPI, BRA, ILCA, IRFL e IRI. La información adicional sobre una accesión dada se puede consultar en cualquier sección relevante de este catálogo.

Esta lista incluye también unos pocos códigos de campo asignados por algunos de los colectores (R. J. Clements, V. Gianluppi, K. L. Mehra, A. L. Peixoto y J. M. Sobrinho). Esto se debe a que no existía ningún otro número de accesión original que hubiera sido asignado en el país de donde era originario el respectivo germoplasma o por la institución a que pertenecía el recolector.

SECTION 9. List of invalid or nonpreferred synonym numbers

Introduction

This section consists of a list of all accessions included in the "Synonym Nos." column of Section 1 (World Collection). They are BRA, CIAT, CPI (including CQ and Q), and IRFL numbers which have been recognized by their respective institutions as redundant synonyms. Whether considered as invalid (BRA and CIAT) or just nonpreferred (CPI and IRFL), they should not be used. ILCA has even completely eliminated its redundant synonym numbers.

Numbers are alphabetically and numerically ordered and cross-referenced to the respective CIAT Nos. (and species identification), and/or to CPI, BRA, ILCA, IRFL, and IRI numbers. For further information of a given accession, any relevant section can be consulted.

SECCION 9. Lista de códigos sinónimos inválidos o no preferidos

Introducción

Esta sección consta de una lista de todas las accesiones incluidas en la columna "Synonym Nos." de la Sección 1 (Colección Mundial). Son números BRA, CIAT, CPI (más CQ y Q) e IRFL que las respectivas instituciones reconocen como sinónimos redundantes. Ya sea que se consideren inválidos (BRA y CIAT) o sólo no preferidos (CPI e IRFL), estos números no se deben usar. ILCA ha eliminado completamente sus códigos sinónimos redundantes.

Estos códigos se presentan en orden alfanumérico, haciendo referencia cruzada a los respectivos números CIAT (y a la identificación de especie) o también a los números CPI, BRA, ILCA, IRFL e IRI. La información adicional sobre una accesión dada se puede consultar en cualquier sección relevante de este catálogo.

APPENDIX II. Natural distribution maps of *Centrosema* spp.

Introduction

This Appendix consists of maps showing the natural distribution of *Centrosema* species. They are taken from a recent biogeographical *Centrosema* study based on information available in February 1987 (Schultze-Kraft et al., n.d.)⁴.

On these maps, a distinction is made between locations from which only herbarium specimens are available (open symbols), and collection sites of germplasm (solid symbols). When germplasm and herbarium material are available from the one location, priority is given to germplasm. A

single symbol can also refer to more than one germplasm accession and/or herbarium specimen if the respective collection sites are sufficiently close.

By distinguishing the collection sites of herbarium specimens from those of living material, germplasm collection gaps can be rapidly identified. It is hoped that this Appendix will assist in the design of strategies for future *Centrosema* collection missions.

APENDICE II. Mapas de distribución de *Centrosema* spp.

Introducción

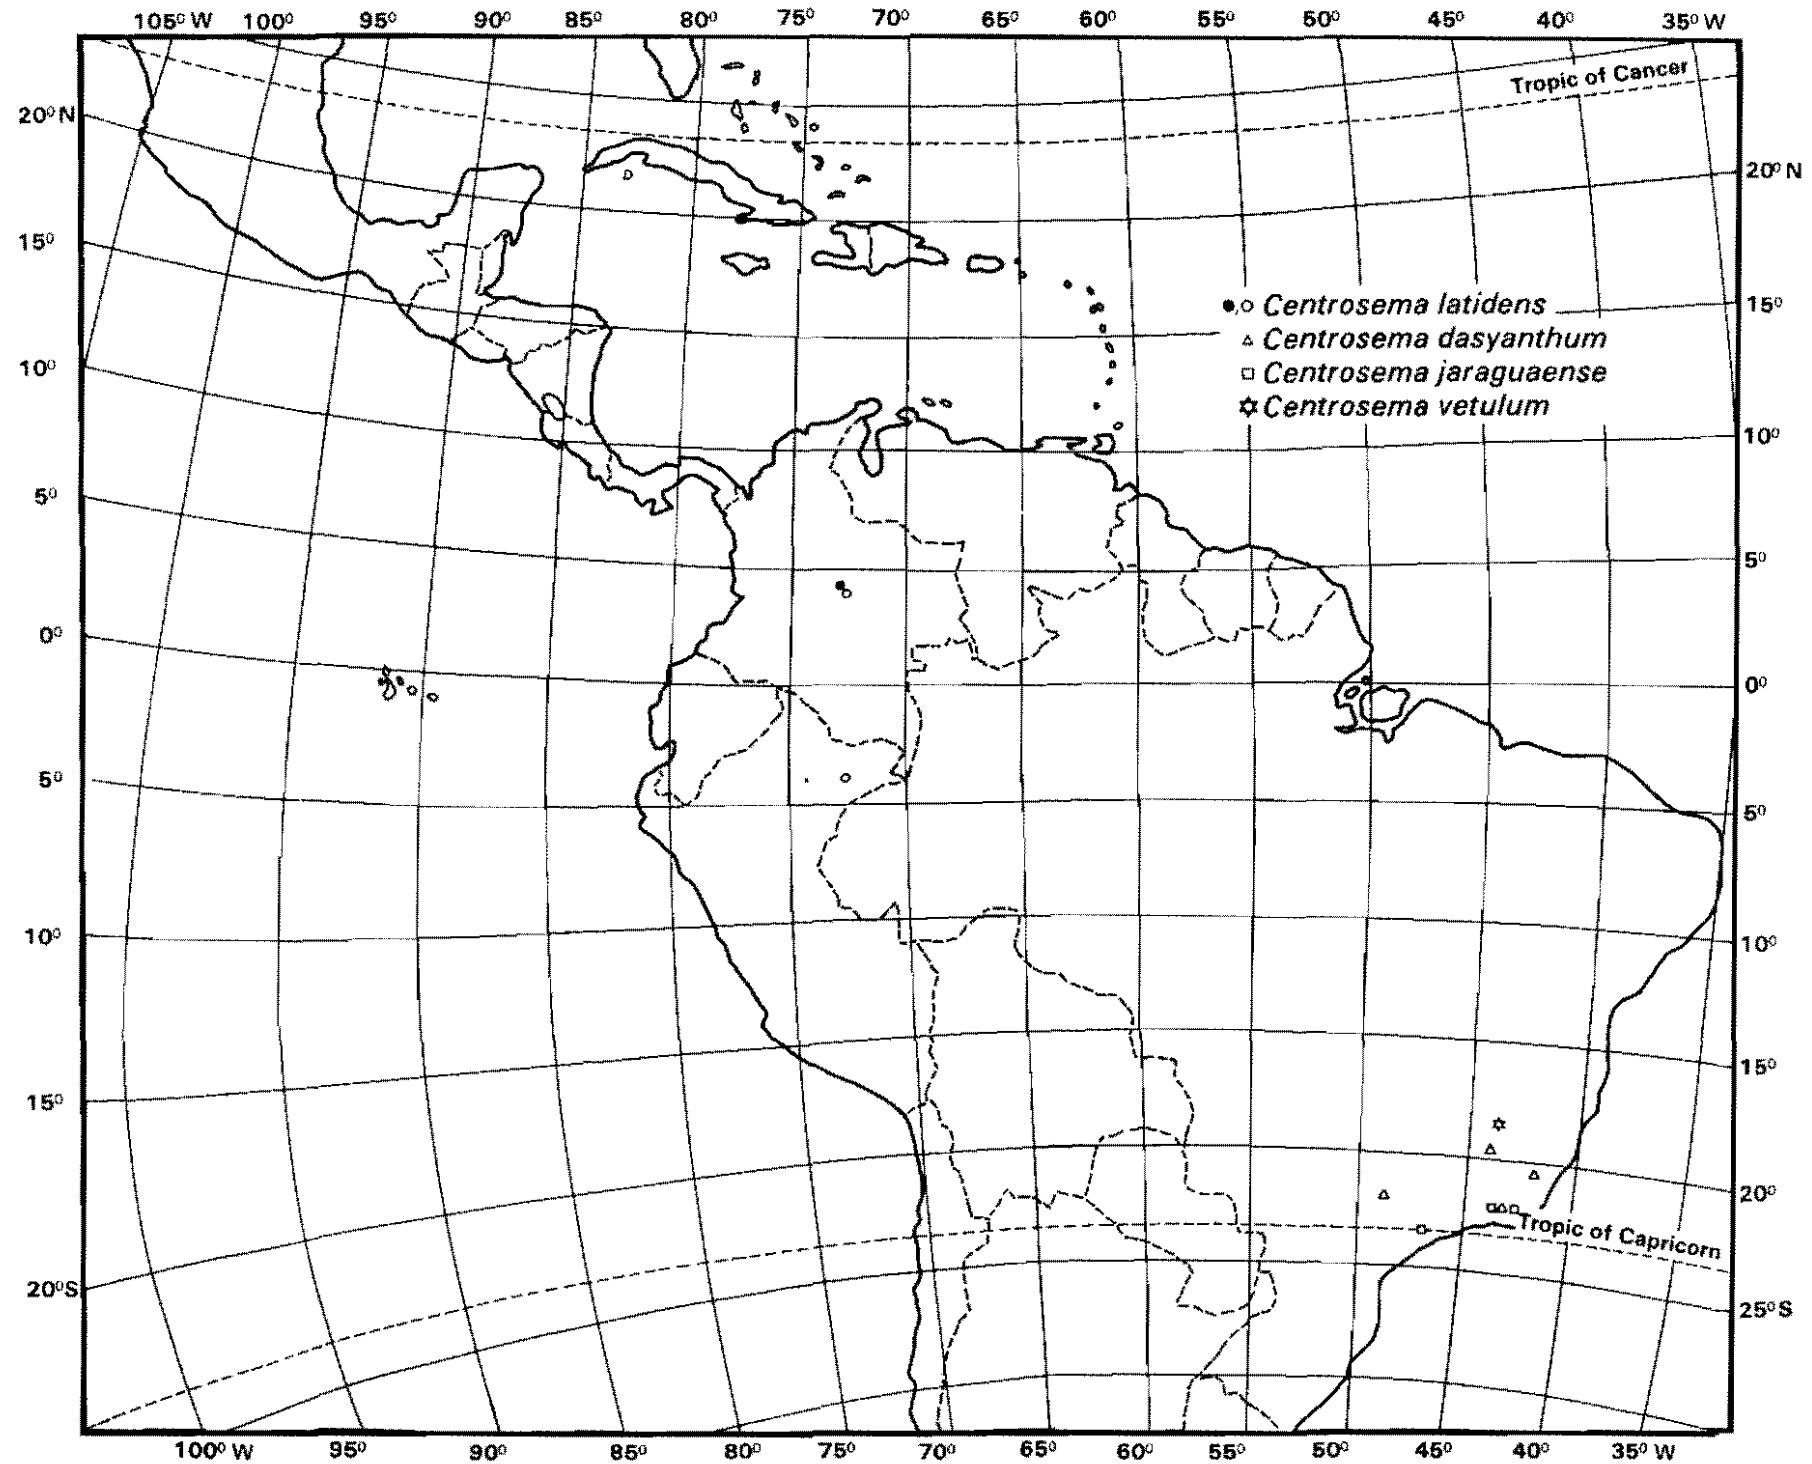

Este apéndice consta de mapas que muestran la distribución natural de las especies de *Centrosema*. Han sido tomados de un reciente estudio biogeográfico sobre *Centrosema* basado en la información disponible en febrero de 1987 (Schultze-Kraft et al., en impresión)⁴.

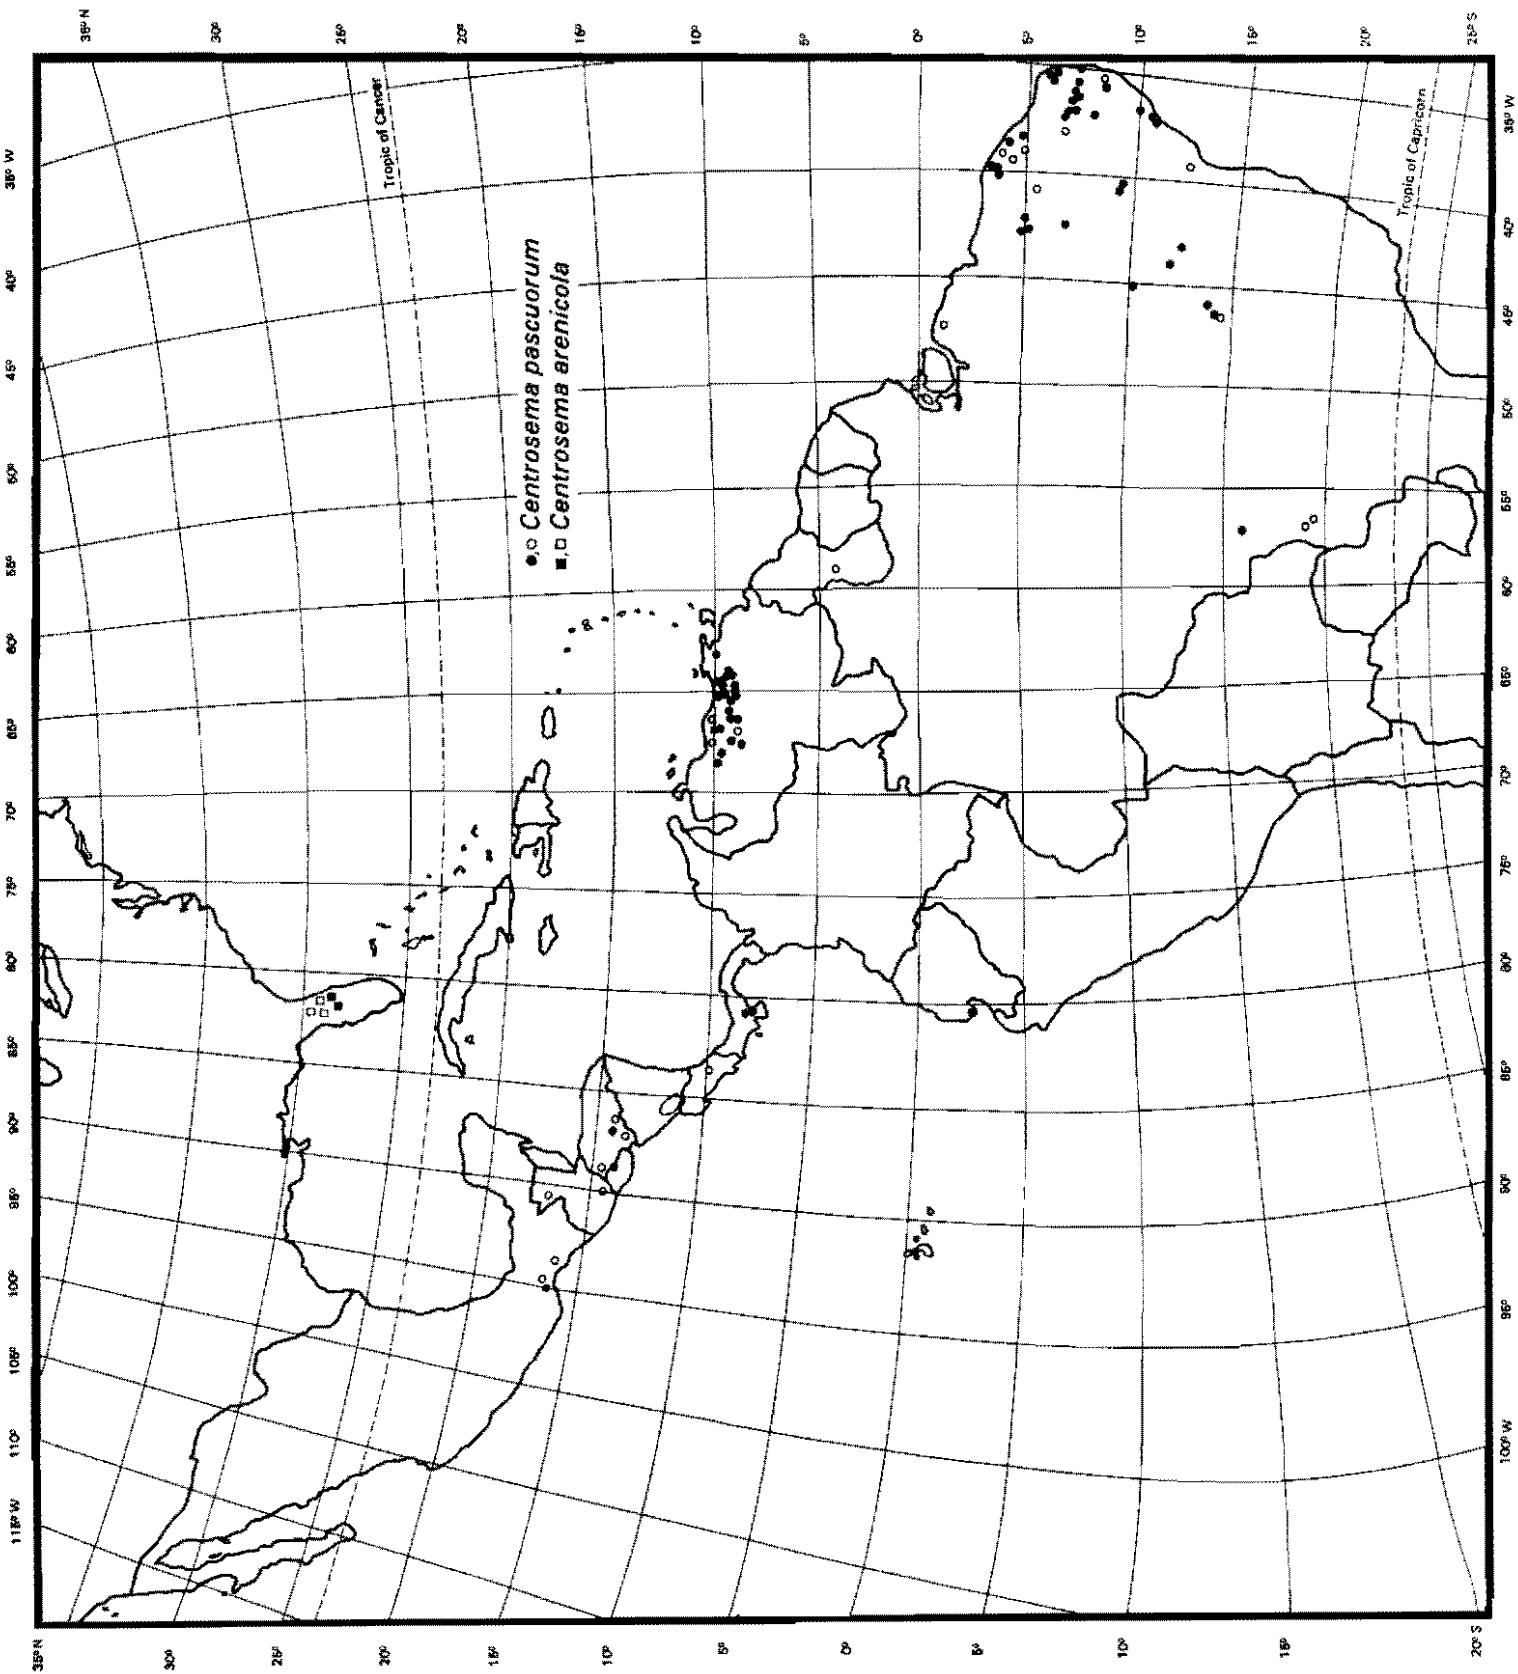

En estos mapas se hace una distinción entre las localidades de recolección del material de herbario (símbolos abiertos) y los sitios de recolección del germoplasma (símbolos sólidos). En los casos en que las localidades del germoplasma y del material de herbario coinciden, se da prioridad al símbolo del germoplasma. Un solo símbolo se puede referir

también a más de una accesión de germoplasma o, también, a más de un espécimen de herbario, si los respectivos sitios de recolección están suficientemente cercanos.

Mediante la distinción entre los sitios de recolección de los materiales de herbario y de germoplasma, se pueden identificar rápidamente las brechas que hay todavía en las colecciones del germoplasma. Se espera que este apéndice contribuya a diseñar estrategias para futuras misiones de recolección del germoplasma de *Centrosema*.
